

WILL A BUDGET SMARTPHONE BREAK YOU?

With budget phones growing more popular, SquareTrade decided to test four wallet-friendly leaders to see how they stack up against the iPhone® 6s when it comes to breakability. Do price and durability go hand in hand? We discovered that you can't judge a smartphone by its cover – or its price.

HOW WE CALCULATE THE SQUARETRADE BREAKABILITY SCORE™

The SquareTrade Breakability Score compares the breakability of today's top devices. Each device is reviewed and scored based on a number of factors, from physical characteristics to the results of SquareTrade's drop, dunk and bend tests. The higher a device scores, the higher the risk of it breaking due to an accident.
